PROFESSIONAL EXPERIENCE

Asha Tech

Software developer

May 2024 — Present

Saket, New Delhi

Developed, tested, and maintained software solutions for flagship products. Collaborated with cross-functional teams to deliver high-quality features and resolve complex technical challenges.

- Engineered key functional features that significantly boosted user interaction and retention metrics.
- Partnered with product managers and designers to align technical implementation with business goals and user needs.

PROJECTS

Wavevisas

Immigration consultancy platform based in Delhi, India.

- Engineered a scalable and SEO-optimized immigration platform using Next.js and React, ensuring fast load times and cross-device compatibility.
- Built modular, dynamic service pages for multiple visa categories, improving maintainability and user experience.
- Optimized lead capture and consultation workflows, streamlining user onboarding and increasing inquiry efficiency.

Aermes

Intelligent Travel Planning Application.

- Integrated an AI-powered chatbot for interactive travel assistance, allowing users to customize itineraries based on preferences.
- Generated dynamic itineraries with map integration, displaying marked destinations and detailed location insights.

AskVinitasri

Spiritual guidance platform built for personalized user interaction.

- Developed a scalable spiritual guidance platform focusing on high performance and seamless user experience.
- Implemented an interactive chat module enabling users to explore personalized spiritual insights.
- Architected dynamic content and user interaction modules, enhancing retention and overall platform usability.
